

BRONZE PORTRAITS

RECESSED BRONZE IMAGE PORTRAITS

This process produces a reverse relief image in bronze. The reverse relief image is made from an original photograph by our in-house designers, this process is demonstrated below.

BRONZE OUTLINE IMAGE PORTRAITS

A detailed outline of an image or scene can be created from a photographic print and incorporated into a bronze plaque. This is an alternative to an actual photograph, it results in a clearly identifiable image in bronze.
