

CREMATION BOOK PLAQUE

Phoenix book plaques are bronze memorials for partners in the form of a book which cater for any time difference between the passing of each partner.

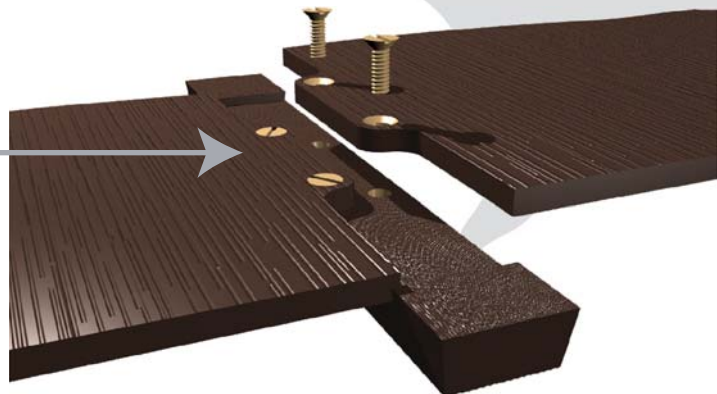

The Phoenix Cremation Book Plaque system is smaller in size and suitable for non-burial situations such as Niche Walls and Gardens.

- > The system consists of a left hand page, a right hand page and a book mark.
- > Overall size is 275mm x 135mm. Each page is 135mm x 100mm.

At the time of the first interment, a blank second page will be supplied. When the second interment occurs, a second page with inscription is ordered and this replaces the original blank page.

- > The book mark locks the 2 pages together. The whole assembly is fixed to the base structure usually by gluing.

Book plaques can be ordered with any appropriate fixing system.
