

# MICRO INSCRIPTION PLAQUES

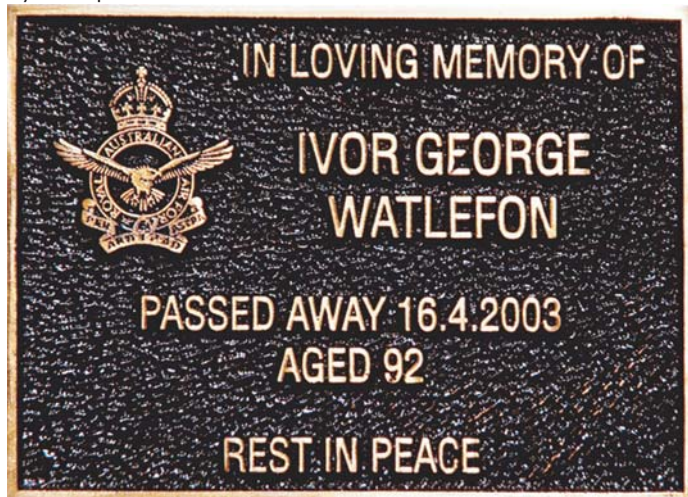

Phoenix has supplied small plaques such as 90 x 65mm for many years. These are used in gardens or on walls as cremation memorials. With the normal plaque manufacturing process it is not possible to produce clear readable inscription less than 16 point (4mm) font size. At Phoenix our research and development team has recently increased our capacity for casting more text on smaller plaques whilst maintaining the highest standards of quality in reproduction.

With our new process, we are able to produce much finer detail in cast bronze. This applies to both inscription and motifs.

All colour and surface texture options are available with Micro Inscription plaques.

Helvetica font is recommended. More complex fonts may be possible but Phoenix designers should be consulted.

*Normal Plaque, minimum inscription and motif size*

<b>Feature Minimum Size</b>	<b>Normal Plaque</b>	<b>Micro Inscription Plaque</b>
Inscription	16 point (4mm)	8 point (2mm) Note Grave number could be 6 point (1.5mm)
Flat Motifs	40mm	15mm
Bas Relief motifs	Size 6 - 50mm	Size 8 - 25mm

## Other applications for Micro Inscription plaques include:

>*Group Memorials*: using 70 x 30mm plates fixed to a base plaque. Inscription limit of 3 lines could be increased to 5 or 6 lines.

>*Honour Rolls*: Inscription size together with number of names usually means honour role plaques can be quite large. The size can be significantly reduced with micro inscription.

*Micro Inscription Plaque (actual size)*
