

STATE AND FEDERAL GOVERNMENT

State & Federal Government, by its nature, is responsible for many functions in daily life. The construction of roads, railways bridges & buildings combined with political activities often requires the permanent recording of events.

Cast bronze plaques, letters, crests & insignia provide a dignified & durable method of recording & commemorating events.

Phoenix can ease the difficulties of dealing with disparate groups of people by its plaque proofing service. Artwork can be created by our compositing staff, forwarded electronically to your office for approval before manufacture commences. Alternatively, a Phoenix designed system can be installed in your office, your staff trained & artwork generation controlled by yourself, the finished artwork is then sent electronically to Phoenix for manufacture.

Our new website also offers customised account information to simplify administration, ordering, tracking and even plaque design and proofing. It is a user friendly and secure system that requires a log-on and password. Visit the website for more information on setting up your secure log-on, and to view more of the great products and services Phoenix offer.
